Veterinary Hematology: A Diagnostic Guide and Color Atlas, 1e John W. Harvey DVM PhD DACVP

Combining essential hematology content with the diagnostic features of an atlas, **Veterinary Hematology: A Diagnostic Guide and Color Atlas** delivers all the information you need to accurately assess and diagnose the blood diseases of common domestic animals - including dogs, cats, horses, cattle, sheep, goats, pigs, and llamas. This all-in-one resource utilizes a clinically-oriented and user-friendly approach to guide you through the processes of selecting relevant diagnostic tests, collecting and preparing samples, interpreting sample results, and determining their clinical significance. High-resolution photomicrographs, full-color illustrations, and excellent schematic drawings, tables, and quick-reference algorithms help you clearly visualize these concepts and procedures.

- **Two books in one** gives you the information of a user-friendly, clinical textbook and the diagnostic features of a color atlas in a single reference.
- **Practical, clinically-relevant text** is comprehensive and yet concise in its delivery of vital information such as:
 - **Principles and procedures** that are employed in recognizing normal, abnormal, and artifactual features of blood and bone marrow samples and developing accurate diagnoses
 - **Common cytochemical stains** and summary charts for interpretation
 - **Sample collection, staining procedures, and diagnostic techniques**
 - **Differentiating features of malignant and benign hematologic disorders**
 - **Miscellaneous cells and blood parasites** and their significance in the evaluation of blood smears
 - **Hematopoietic and non-hematopoietic neoplasms**
- **High-resolution photomicrographs** and excellent **schematic drawings, tables, boxes and quick-reference algorithms** aid your understanding of basic clinical concepts and differential diagnostic considerations.
- **Over 800 full-color illustrations** help you clearly visualize the concepts and clinical features of the blood and bone marrow - from normal cell maturation to the development of various pathologies.
