Integrated Circuit and System Design (13th International Workshop, PATMOS 2003)

Integrated Circuit and System Design (13th International Workshop, PATMOS 2003)

Welcome to the proceedings of PATMOS 2003. This was the 13th in a series of international workshops held in several locations in Europe. Over the years, PATMOS has gained recognition as one of the major European events devoted to power and timing aspects of integrated circuit and system design. Despite its significant growth and development, PATMOS can still be considered as a very informal forum, featuring high-level scientific presentations together with open discussions and panel sessions in a free and relaxed environment. This year, PATMOS took place in Turin, Italy, organized by the Politecnico di Torino, with technical co-sponsorship from the IEEE Circuits and Systems Society and the generous support of the European Commission, as well as that of several industrial sponsors, including BullDAST, Cadence, Mentor Graphics, STMicroelectronics, and Synopsys. The objective of the PATMOS workshop is to provide a forum to discuss and investigate the emerging problems in methodologies and tools for the design of new generations of integrated circuits and systems. A major emphasis of the technical program is on speed and low-power aspects, with particular regard to modeling, characterization, design, and architectures.

From reader reviews:

Jackie Gonzalez:

Why don't make it to become your habit? Right now, try to ready your time to do the important action, like looking for your favorite publication and reading a publication. Beside you can solve your short lived problem; you can add your knowledge by the publication entitled Integrated Circuit and System Design (13th International Workshop, PATMOS 2003). Try to the actual book Integrated Circuit and System Design (13th International Workshop, PATMOS 2003) as your pal. It means that it can to get your friend when you experience alone and beside that course make you smarter than before. Yeah, it is very fortunated to suit your needs. The book makes you a lot more confidence because you can know anything by the book. So , we should make new experience as well as knowledge with this book.

Michael Rodriguez:

Hey guys, do you really wants to finds a new book to read? May be the book with the name Integrated Circuit and System Design (13th International Workshop, PATMOS 2003) suitable to you? The actual book was written by well known writer in this era. The particular book untitled Integrated Circuit and System Design (13th International Workshop, PATMOS 2003)is the main of several books this everyone read now. That book was inspired a lot of people in the world. When you read this book you will enter the new dimensions that you ever know ahead of. The author explained their concept in the simple way, consequently all of people can easily to know the core of this publication. This book will give you a great deal of information about this world now. To help you see the represented of the world in this particular book.

Samantha Bond:

With this era which is the greater individual or who has ability to do something more are more valuable than other. Do you want to become one among it? It is just simple strategy to have that. What you have to do is just spending your time not very much but quite enough to have a look at some books. One of several books in the top list in your reading list is actually Integrated Circuit and System Design (13th International Workshop, PATMOS 2003). This book that is certainly qualified as The Hungry Mountains can get you closer in getting precious person. By looking upwards and review this e-book you can get many advantages.

Richard Lawrence:

A lot of guide has printed but it is different. You can get it by online on social media. You can choose the very best book for you, science, comedy, novel, or whatever by simply searching from it. It is called of book Integrated Circuit and System Design (13th International Workshop, PATMOS 2003). Contain your knowledge by it. Without causing the printed book, it could possibly add your knowledge and make anyone happier to read. It is most crucial that, you must aware about book. It can bring you from one place to other place.
