Business Process Management: Theory and Applications (Studies in Computational Intelligence)

Business Process Management: Theory and Applications (Studies in Computational Intelligence)

Business Process Management (BPM) has been in existence for decades. It uses, complements, integrates and extends theories, methods and tools from other scientific disciplines like: strategic management, information technology, managerial accounting, operations management etc. During this period the main focus themes of researchers and professionals in BPM were: business process modeling, business process analysis, activity based costing, business process simulation, performance measurement, workflow management, the link between information technology and BPM for process automation etc. More recently the focus moved to subjects like Knowledge Management, Enterprise Resource Planning (ERP) Systems, Service Oriented Architectures (SOAs), Process Intelligence (PI) and even Social Networks. In this collection of papers we present a review of the work and the outcomes achieved in the classic BPM fields as well as a deeper insight on recent advances in BPM. We present a review of business process modeling and analysis and we elaborate on issues like business process quality and process performance measurement as well as their link to all other organizational aspects like human resources management, strategy, information technology (being SOA, PI or ERP), other managerial systems, job descriptions etc. We also present recent advances to BPR tools with special focus on information technology, workflow, business process modeling and human resources management tools. Other chapters elaborate on the aspect of business process and organizational costing and their relationship to business process analysis, organizational change and reorganization. In the final chapters we present some new approaches that use fuzzy cognitive maps and a recently developed software tool for scenario creation and simulation in strategic management, business process management, performance measurement and social networking.

The audience of this book is quite wide. The first chapters can be read by professionals, academics and students who want to get some basic insight into the BPM field whereas the remaining present more elaborate and state of the art concepts methodologies and tools for an audience of a more advanced level.

From reader reviews:

Samantha Campbell:

The reserve untitled Business Process Management: Theory and Applications (Studies in Computational Intelligence) is the book that recommended to you to learn. You can see the quality of the e-book content that will be shown to you. The language that article author use to explained their way of doing something is easily to understand. The writer was did a lot of investigation when write the book, to ensure the information that they share for you is absolutely accurate. You also can get the e-book of Business Process Management: Theory and Applications (Studies in Computational Intelligence) from the publisher to make you a lot more enjoy free time.

Joshua Bush:

Do you really one of the book lovers? If yes, do you ever feeling doubt while you are in the book store? Attempt to pick one book that you just dont know the inside because don't ascertain book by its deal with may doesn't work the following is difficult job because you are afraid that the inside maybe not while fantastic as in the outside seem likes. Maybe you answer is usually Business Process Management: Theory and Applications (Studies in Computational Intelligence) why because the wonderful cover that make you consider in regards to the content will not disappoint an individual. The inside or content is fantastic as the outside or even cover. Your reading sixth sense will directly direct you to pick up this book.

Edward Emory:

In this time globalization it is important to someone to get information. The information will make professionals understand the condition of the world. The condition of the world makes the information quicker to share. You can find a lot of referrals to get information example: internet, classifieds, book, and soon. You can observe that now, a lot of publisher that will print many kinds of book. Often the book that recommended to you personally is Business Process Management: Theory and Applications (Studies in Computational Intelligence) this publication consist a lot of the information on the condition of this world now. This book was represented how can the world has grown up. The language styles that writer require to explain it is easy to understand. Often the writer made some study when he makes this book. This is why this book ideal all of you.

Clarence Anderson:

Beside that Business Process Management: Theory and Applications (Studies in Computational Intelligence) in your phone, it could give you a way to get closer to the new knowledge or facts. The information and the knowledge you are going to got here is fresh from your oven so don't become worry if you feel like an old people live in narrow town. It is good thing to have Business Process Management: Theory and Applications (Studies in Computational Intelligence) because this book offers for your requirements readable information. Do you sometimes have book but you seldom get what it's facts concerning. Oh come on, that would not

happen if you have this inside your hand. The Enjoyable agreement here cannot be questionable, just like treasuring beautiful island. Use you still want to miss that? Find this book as well as read it from now!
