Managerial Economics in a Global Economy Dominick Salvatore

Managerial Economics in a Global Economy, Sixth Edition, synthesizes economic theory, decision science, and various aspects of business administration studies, examining how they interact as a firm attempts to reach optimal profitability and efficiency in the face of constraints. It features 129 real-world case studies and six longer, detailed studies--more than any other text on the market. In addition, author Dominick Salvatore fully integrates material on the international ramifications of managerial decisions into the entire text, instead of segregating it in a separate chapter or in a few case studies.

The book is divided into five parts. *Part One* examines the nature and scope of managerial economics, presents the theory of the firm, and reviews optimization techniques. *Part Two* analyzes demand. *Part Three* presents the theory and measurement of the firm's production and costs. *Part Four* brings together demand analysis with production and cost analysis to show how price and output are determined under various forms of market organization. *Part Five* examines regulation and antitrust, the role of government in the economy, risk analysis, long-term investment decisions, and capital budgeting.

Managerial Economics in a Global Economy, Sixth Edition, is ideal for upper-level undergraduate and graduate courses in managerial economics.
